

QUALITY POLICY

The Burnet Diagnostics Initiative (BDI) aims to be an Industry Leader in the development of diagnostic assays addressing unmet medical needs.

We are committed to maintaining a Quality Management System that ensures compliance with customer, legal and regulatory requirements as well as the International Quality Management Standard ISO 9001:2015.

This Quality Policy provides a framework for establishing and reviewing quality objectives as set out in the BDI Strategy Plan which shall be reviewed annually.

Our Quality Policy is defined and strongly driven by the following management principles and behaviours:

1. Building a mutually beneficial relationship with all interested parties through understanding their requirements and satisfying their needs.
2. Implementing risk-based processes and controls that ensure tasks are performed to the highest standard, consistent with our quality processes and procedures, and meets customer expectations using an evidence-based decision-making process.
3. Continually improving products and services based on efficient business processes, well defined measurements, best practices, and stakeholder engagement.
4. Developing innovative products based on advances in scientific discovery, that align to the Burnet Institute's Statement of Purpose, and represent best industry quality practice.
5. Developing staff competencies, encouraging creativity, instilling accountability, and empowering staff through appropriate development programs, inclusion in management and decision-making processes.

Management is committed to continually reviewing, improving, and communicating provisions to the Quality Management System and its Quality Policy to ensure it is understood by key stakeholders and that it remains relevant and effective aligned to our strategic intentions.
