

2018 WORLD HEPATITIS DAY SYMPOSIUM:

# Preventing Disease, Preventing Deaths

Join community leaders, experts and policy makers to discuss approaches and challenges to the elimination of viral hepatitis.

Also hear the latest on progress to achieving elimination within defined areas or groups: micro-elimination among people co-infected with HIV in cities; viral hepatitis as a cause of cancer; and exploring vaccines and direct-acting antivirals as cancer prevention tools.

Don't miss an update on the Burnet-led NHMRC program to eliminate hepatitis C in Australia.

**MONDAY 30 JULY 2018**

**12:30PM – 5:00PM**

(lunch from 12:00noon)
