Process 8. Islands and Causeways. How will we get to our results?

Resources for developing National Strategic Frameworks
Building results chains: “islands and causeways”

- Have lots of A4 colored sheets available
- Write down some priority issues (e.g. Treatment of STIs, Prevention of HIV) and assign some people to stand on papers with these headings: these are the “islands” we want to get to
- The rest of the group help identify some ways to reach those islands: the “causeways”
- The examples here demonstrate how this works: from the Marshall Islands 2011
- This is a “friendly way” to start thinking about the Results Chain
Identifying Priorities: “Islands & Causeways”
